

Systematic Curriculum and Instructional Design (SCID) Virtual Institute Agenda

General Goal

The SCID Virtual Institute is a follow-on program to the Developing a Curriculum (DACUM) training. This institute guides participants in the creation of curricular components of a competency-based training program. Participants will acquire the knowledge and skills to be able to develop competency-based instructional materials such as task analysis, on-the-job training (OJT) manuals, and performance assessments. Individual work and group instruction are supplemented with instructor feedback to make it a truly hands-on learning experience.

Performance objectives

Throughout this institute participants will:

- Perform a task analysis.
- Write learning objectives.
- Create a curriculum outline.
- Design a curriculum component.
- Develop a performance assessment.
- Develop a rubric.

Institute Agenda

Week 1

- Review syllabus.
- Complete Introduction module.
- Attend synchronous virtual webinar to meet facilitators and fellow participants, and review requirements of the institute.

Week 2

- Complete Competency-based Learning module.

Course: SCID Virtual Institute**Week 3**

- Complete Task Analysis module.
- Attend synchronous virtual webinar to discuss completed modules and what to expect in the coming weeks.

Week 4

- Attend synchronous virtual webinar to practice facilitating Task Analysis.
- Complete and submit Task Analysis performance assignment using the task that you were the subject matter expert for in the Task Analysis practice.

Week 5

- Complete Learning Objectives module.
- Complete and submit Learning Objectives performance assignment using your Task Analysis data.
- Complete Curriculum Outline module.
- Complete and submit Curriculum Outline performance assignment using your Learning Objectives and Task Analysis data.

Week 6

- Complete Curriculum Design module.
- Attend synchronous virtual webinar to discuss completed modules and what to expect in the coming weeks.

Week 7

- Complete and submit Curriculum Component performance assignment (choose 1): asynchronous learning storyboard, synchronous sessions slides, or on-the-job training manual. Use data from your previous assignments.

Week 8

- Complete Assessments module.
- Complete and submit Performance Assessment performance assignment using data from your previous assignments.
- Complete and submit Rubric performance assignment. This rubric should help evaluate the performance of learners completing the Performance Assessment.
